Science and the Akashic Field: An Integral Theory of Everything Ervin Laszlo

Introduces the embracing world-concept long sought by scientists, mystics, and sages: an Integral Theory of Everything

- Explains how modern science has rediscovered the Akashic Field of perennial philosophy
- Reveals how the universe stores a record of all that is happening and has ever happened on Earth and throughout the cosmos
- Explores the origins, role, and future of life and consciousness in the universe

Mystics and sages have long maintained that there exists an interconnecting cosmic field at the roots of reality that conserves and conveys information, a field known as the Akashic record. Recent discoveries in the new field of vacuum physics now show that this Akashic field is real and has its equivalent in the zero-point field that underlies space itself. This field consists of a subtle sea of fluctuating energies from which all things arise: atoms and galaxies, stars and planets, living beings, and even consciousness. This zero-point Akashic-field--or "A-field"-- is not only the original source of all things that arise in time and space; it is also the constant and enduring memory of the universe. It holds the record of all that ever happened in life, on Earth, and in the cosmos and relates it to all that is yet to happen.

Scientist and philosopher Ervin Laszlo conveys the essential element of this vision of the "informed universe" in language that is accessible and clear. The informed universe lends credence to our deepest intuitions of the oneness of life and the whole of creation. We discover that, as philosopher William James stated, "we are like islands in the sea, separate on the surface but connected in the deep."
