## Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials

"The goal is to provide a comprehensive reference book for the preclinical discovery and development scientist whose responsibilities span target identification, lead candidate selection, pharmacokinetics, pharmacology, and toxicology, and for regulatory scientists whose responsibilities include the evaluation of novel therapies."

—From the Afterword by Anthony D. Dayan

Proper preclinical safety evaluation can improve the predictive value, lessen the time and cost of launching new biopharmaceuticals, and speed potentially lifesaving drugs to market. This guide covers topics ranging from lead candidate selection to establishing proof of concept and toxicity testing to the selection of the first human doses. With chapters contributed by experts in their specific areas, *Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials*:

- Includes an overview of biopharmaceuticals with information on regulation and methods of production
- Discusses the principles of ICH S6 and their implementation in the U.S., Europe, and Japan
- Covers current practices in preclinical development and includes a comparison of safety assessments for small molecules with those for biopharmaceuticals
- Addresses all aspects of the preclinical evaluation process, including: the selection of relevant species; safety/toxicity endpoints; specific considerations based upon class; and practical considerations in the design, implementation, and analysis of biopharmaceuticals
- Covers transitioning from preclinical development to clinical trials

This is a hands-on, straightforward reference for professionals involved in preclinical drug development, including scientists, toxicologists, project managers, consultants, and regulatory personnel.

### **From reader reviews:**

#### **Jennifer Jones:**

What do you regarding book? It is not important together with you? Or just adding material when you require something to explain what the ones you have problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have time? What did you do? Every person has many questions above. They need to answer that question because just their can do in which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this kind of Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials to read.

#### **Rose Slagle:**

Now a day people who Living in the era everywhere everything reachable by connect to the internet and the resources inside can be true or not need people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the answer then is reading a book. Studying a book can help individuals out of this uncertainty Information specifically this Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials book since this book offers you rich facts and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

#### **Edward Stevenson:**

People live in this new time of lifestyle always aim to and must have the time or they will get lots of stress from both everyday life and work. So , if we ask do people have extra time, we will say absolutely indeed. People is human not only a robot. Then we question again, what kind of activity do you possess when the spare time coming to you of course your answer will certainly unlimited right. Then do you try this one, reading textbooks. It can be your alternative inside spending your spare time, the actual book you have read is definitely Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials.

#### **Karen Bright:**

Reading a guide make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is composed or printed or highlighted from each source this filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Preclinical Safety Evaluation of Biopharmaceuticals: A Science-Based Approach to Facilitating Clinical Trials when you needed it?
