Introduction to Machine Learning (Adaptive Computation and Machine Learning series) Ethem Alpaydin

The goal of machine learning is to program computers to use example data or past experience to solve a given problem. Many successful applications of machine learning exist already, including systems that analyze past sales data to predict customer behavior, optimize robot behavior so that a task can be completed using minimum resources, and extract knowledge from bioinformatics data. *Introduction to Machine Learning* is a comprehensive textbook on the subject, covering a broad array of topics not usually included in introductory machine learning texts. Subjects include supervised learning; Bayesian decision theory; parametric, semi-parametric, and nonparametric methods; multivariate analysis; hidden Markov models; reinforcement learning; kernel machines; graphical models; Bayesian estimation; and statistical testing.

Machine learning is rapidly becoming a skill that computer science students must master before graduation. The third edition of *Introduction to Machine Learning* reflects this shift, with added support for beginners, including selected solutions for exercises and additional example data sets (with code available online). Other substantial changes include discussions of outlier detection; ranking algorithms for perceptrons and support vector machines; matrix decomposition and spectral methods; distance estimation; new kernel algorithms; deep learning in multilayered perceptrons; and the nonparametric approach to Bayesian methods. All learning algorithms are explained so that students can easily move from the equations in the book to a computer program. The book can be used by both advanced undergraduates and graduate students. It will also be of interest to professionals who are concerned with the application of machine learning methods.

From reader reviews:

Christina Moss:

In this 21st millennium, people become competitive in most way. By being competitive now, people have do something to make them survives, being in the middle of typically the crowded place and notice by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yep, by reading a reserve your ability to survive improve then having chance to endure than other is high. In your case who want to start reading a book, we give you this specific Introduction to Machine Learning (Adaptive Computation and Machine Learning series) book as nice and daily reading reserve. Why, because this book is usually more than just a book.

Vicky Moore:

Hey guys, do you would like to finds a new book to learn? May be the book with the subject Introduction to Machine Learning (Adaptive Computation and Machine Learning series) suitable to you? The book was written by well-known writer in this era. The particular book untitled Introduction to Machine Learning (Adaptive Computation and Machine Learning series)is a single of several books that will everyone read now. This specific book was inspired a lot of people in the world. When you read this publication you will enter the new dimension that you ever know before. The author explained their plan in the simple way, consequently all of people can easily to recognise the core of this publication. This book will give you a lots of information about this world now. So that you can see the represented of the world within this book.

Beth Stewart:

The reason why? Because this Introduction to Machine Learning (Adaptive Computation and Machine Learning series) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will zap you with the secret the idea inside. Reading this book beside it was fantastic author who also write the book in such awesome way makes the content on the inside easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This book will give you a lot of rewards than the other book have such as help improving your expertise and your critical thinking technique. So , still want to hesitate having that book? If I were you I will go to the e-book store hurriedly.

Joseph Wood:

You may spend your free time to read this book this e-book. This Introduction to Machine Learning (Adaptive Computation and Machine Learning series) is simple to develop you can read it in the area, in the beach, train as well as soon. If you did not have much space to bring often the printed book, you can buy typically the e-book. It is make you easier to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
