Statistical Programming in SAS

A. John Bailer PhD

Statistical Programming in SAS A. John Bailer PhD
In *Statistical Programming in SAS*, author A. John Bailer integrates SAS tools with interesting statistical applications and uses SAS 9.2 as a platform to introduce programming ideas for statistical analysis, data management, and data display and simulation. Written using a reader-friendly and narrative style, the book includes extensive examples and case studies to present a well-structured introduction to programming issues.

This book has two parts. The first part addresses the nuts and bolts of programming, including fostering good programming habits, getting external data sets into SAS to construct an analysis data set, generating basic descriptive statistical summaries, producing customized tables, generating more attractive output, and producing high-quality graphical displays. The second part emphasizes programming in the context of a DATA step, in macros, and in SAS/IML software.

Examples of statistical methods and concepts not always encountered in basic statistics courses (for example, bootstrapping, randomization tests, and jittering) are used to illustrate programming ideas. This book provides extensive illustrations of the new statistical graphics procedures in SAS, a description of the new ODS Graphics Editor, and an introduction to some of the capabilities of SAS/IML Studio, such as producing dynamically linked data displays and invoking R from SAS.

From reader reviews:

Jeff Farley:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a book. Beside you can solve your condition; you can add your knowledge by the publication entitled Statistical Programming in SAS. Try to make book Statistical Programming in SAS as your pal. It means that it can to get your friend when you sense alone and beside regarding course make you smarter than previously. Yeah, it is very fortuned to suit your needs. The book makes you a lot more confidence because you can know anything by the book. So , we should make new experience along with knowledge with this book.

Eden Cohn:

As people who live in the actual modest era should be update about what going on or information even knowledge to make these people keep up with the era that is certainly always change and move forward. Some of you maybe will certainly update themselves by examining books. It is a good choice in your case but the problems coming to anyone is you don't know what one you should start with. This Statistical Programming in SAS is our recommendation to make you keep up with the world. Why, because book serves what you want and want in this era.

Denita Lumley:

In this time globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Typically the book that recommended to you is Statistical Programming in SAS this reserve consist a lot of the information with the condition of this world now. This specific book was represented just how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book ideal all of you.

Jonathan Bean:

Many people said that they feel bored when they reading a publication. They are directly felt the item when they get a half regions of the book. You can choose the actual book Statistical Programming in SAS to make your reading is interesting. Your current skill of reading expertise is developing when you similar to reading. Try to choose basic book to make you enjoy you just read it and mingle the sensation about book and looking at especially. It is to be first opinion for you to like to available a book and read it. Beside that the publication Statistical Programming in SAS can to be your brand-new friend when you're feel alone and confuse in doing what must you're doing of this time.
