This groundbreaking book makes sense of the complexities and dynamics of post-colonial politics, illustrating how post-colonial theory has marginalised a huge part of its constituency, namely Africa.

*Politics and Post-Colonial Theory* traces how African identity has been constituted and reconstituted by examining issues such as:

- \* negritude
- \* the rise of nationalism
- \* decolonisation.

The book also questions how helpful post-colonial analysis can be in understanding the complexities which define institutions including:

- \* the nation-state
- \* civil society
- \* human rights
- \* citizenship.

*Politics and Post-colonial Theory* bravely breaks down disciplinary boundaries. Its radical vision will be essential reading for all those engaged in Politics, post-colonial studies and African studies.
