The celebrated "Surgical Techniques in Orthopaedics and Traumatology Series", published under the auspices of the European Federation of National Associations of Orthopaedics and Traumatology (EFORT), is now available as an 8-volume paperback set, allowing you to access the information you require, at the right price. In this volume, 58 articles written by 78 well-known European specialists address the major techniques to manage fractures, muscle and ligament injuries, congenital anomalies and other pathologies affecting the femur and knee. The surgical techniques are described step by step and illustrated by more than 550 drawings and photographs. Variations of the techniques are discussed, as well as complications and clinical results. Indications are provided when necessary for the choice of treatment.
