MATLAB-Based Electromagnetics

Branislav M. Notaros

MATLAB-Based Electromagnetics Branislav M. Notaros

This title can be used to either complement another electromagnetics text, or as an independent resource. Designed primarily for undergraduate electromagnetics, it can also be used in follow-up courses on antennas, propagation, microwaves, advanced electromagnetic theory, computational electromagnetics, electrical machines, signal integrity, etc. This title also provides practical content to current and aspiring industry professionals.

MATLAB-Based Electromagnetics provides engineering and physics students and other users with an operational knowledge and firm grasp of electromagnetic fundamentals aimed toward practical engineering applications, by teaching them “hands on” electromagnetics through a unique and comprehensive collection of MATLAB computer exercises and projects. Essentially, the book unifies two themes: it presents and explains electromagnetics using MATLAB on one side, and develops and discusses MATLAB for electromagnetics on the other.

MATLAB codes described (and listed) in TUTORIALS or proposed in other exercises provide prolonged benefits of learning. By running codes; generating results, figures, and diagrams; playing movies and animations; and solving a large variety of problems in MATLAB, in class, with peers in study groups, or individually, readers gain a deep understanding of electromagnetics.

From reader reviews:

Marguerite Boutte:

The reason? Because this MATLAB-Based Electromagnetics is an unordinary book that the inside of the guide waiting for you to snap the idea but latter it will shock you with the secret the idea inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content inside of easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This unique book will give you a lot of gains than the other book have such as help improving your talent and your critical thinking means. So , still want to delay having that book? If I were you I will go to the reserve store hurriedly.

Sandra Passmore:

Is it you actually who having spare time in that case spend it whole day through watching television programs or just laying on the bed? Do you need something new? This MATLAB-Based Electromagnetics can be the respond to, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this new era is common not a geek activity. So what these textbooks have than the others?

Ruth Haddock:

Don't be worry should you be afraid that this book will filled the space in your house, you might have it in e-book technique, more simple and reachable. That MATLAB-Based Electromagnetics can give you a lot of friends because by you looking at this one book you have thing that they don't and make you more like an interesting person. This book can be one of a step for you to get success. This guide offer you information that might be your friend doesn't realize, by knowing more than additional make you to be great folks. So , why hesitate? Let's have MATLAB-Based Electromagnetics.

Patricia Stroud:

Reserve is one of source of knowledge. We can add our expertise from it. Not only for students but native or citizen require book to know the up-date information of year for you to year. As we know those textbooks have many advantages. Beside we all add our knowledge, can also bring us to around the world. From the book MATLAB-Based Electromagnetics we can consider more advantage. Don't you to definitely be creative people? Being creative person must love to read a book. Just simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life with that book MATLAB-Based Electromagnetics. You can more attractive than now.
