Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) Neal Koblitz

The theory of elliptic curves and modular forms provides a fruitful meeting ground for such diverse areas as number theory, complex analysis, algebraic geometry, and representation theory. This book starts out with a problem from elementary number theory and proceeds to lead its reader into the modern theory, covering such topics as the Hasse-Weil L-function and the conjecture of Birch and Swinnerton-Dyer. The second edition of this text includes an updated bibliography indicating the latest, dramatic changes in the direction of proving the Birch and Swinnerton conjecture. It also discusses the current state of knowledge of elliptic curves.

From reader reviews:

Matthew Thompson:

The book Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) can give more knowledge and information about everything you want. Why must we leave the great thing like a book Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97)? Some of you have a different opinion about e-book. But one aim that book can give many info for us. It is absolutely right. Right now, try to closer with the book. Knowledge or details that you take for that, it is possible to give for each other; you can share all of these. Book Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) has simple shape nevertheless, you know: it has great and massive function for you. You can appear the enormous world by start and read a guide. So it is very wonderful.

Maurice Lamothe:

Book is to be different for every single grade. Book for children until adult are different content. To be sure that book is very important for people. The book Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) seemed to be making you to know about other know-how and of course you can take more information. It is very advantages for you. The publication Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) is not only giving you considerably more new information but also to get your friend when you really feel bored. You can spend your own personal spend time to read your guide. Try to make relationship while using book Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97). You never sense lose out for everything when you read some books.

Dale Eich:

Many people spending their time period by playing outside together with friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to enjoy your whole day by studying a book. Ugh, you think reading a book will surely hard because you have to accept the book everywhere? It okay you can have the e-book, getting everywhere you want in your Cell phone. Like Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) which is obtaining the e-book version. So , try out this book? Let's find.

Mary Patterson:

As we know that book is very important thing to add our know-how for everything. By a book we can know everything we really wish for. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This publication Introduction to Elliptic Curves and Modular Forms (Graduate Texts in Mathematics, No. 97) was filled concerning science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading a book. If you know how big benefit from a book, you can sense enjoy to read a publication. In the modern era like at this point, many

ways to get book that you just wanted.
