Fundamentals of Computer Networks Alireza Salehi Nejad

This book reviews my recent studies conducted on computer networks with a systematic approach. The research discussions include studies of field of view, introduction to technology, spin-off network, development and evaluation of technology, network topology, and wireless networks. The purpose of this book is to draw a concrete perspective of applicable designs in networking industry and alternative approaches. Hence principles and techniques of applied designs of a home network and an organization including necessary network designs, programming languages, transmission medium, and essential hardware and software are debated.
