Protein Surface Recognition: Approaches for Drug Discovery

Protein Surface Recognition: Approaches for Drug Discovery

A new perspective on the design of molecular therapeutics is emerging. This new strategy emphasizes the rational complementation of functionality along extended patches of a protein surface with the aim of inhibiting protein/protein interactions. The successful development of compounds able to inhibit these interactions offers a unique chance to selectively intervene in a large number of key cellular processes related to human disease.

Protein Surface Recognition presents a detailed treatment of this strategy, with topics including:

- an extended survey of protein-protein interactions that are key players in human disease and biology and the potential for therapeutics derived from this new perspective
- the fundamental physical issues that surround protein-protein interactions that must be considered when designing ligands for protein surfaces
- examples of protein surface-small molecule interactions, including treatments of protein-natural product interactions, protein-interface peptides, and rational approaches to protein surface recognition from model to biological systems
- a survey of techniques that will be integral to the discovery of new small molecule protein surface binders, from high throughput synthesis and screening techniques to *in silico* and *in vitro* methods for the discovery of novel protein ligands.

Protein Surface Recognition provides an intellectual “tool-kit” for investigators in medicinal and bioorganic chemistry looking to exploit this emerging paradigm in drug discovery.

From reader reviews:

Stephen Bruns:

Within other case, little people like to read book Protein Surface Recognition: Approaches for Drug Discovery. You can choose the best book if you like reading a book. So long as we know about how is important any book Protein Surface Recognition: Approaches for Drug Discovery. You can add understanding and of course you can around the world by the book. Absolutely right, mainly because from book you can recognize everything! From your country right up until foreign or abroad you may be known. About simple thing until wonderful thing it is possible to know that. In this era, we are able to open a book or maybe searching by internet device. It is called e-book. You should use it when you feel fed up to go to the library. Let's examine.

Ollie Brooks:

In this 21st one hundred year, people become competitive in each and every way. By being competitive now, people have do something to make all of them survives, being in the middle of the actual crowded place and notice by surrounding. One thing that at times many people have underestimated it for a while is reading. Yeah, by reading a reserve your ability to survive improve then having chance to endure than other is high. To suit your needs who want to start reading a new book, we give you this Protein Surface Recognition: Approaches for Drug Discovery book as starter and daily reading publication. Why, because this book is greater than just a book.

Mary Lamm:

Hey guys, do you wishes to finds a new book to learn? May be the book with the headline Protein Surface Recognition: Approaches for Drug Discovery suitable to you? Often the book was written by popular writer in this era. Typically the book untitled Protein Surface Recognition: Approaches for Drug Discovery is the one of several books in which everyone read now. This specific book was inspired many men and women in the world. When you read this guide you will enter the new dimension that you ever know just before. The author explained their strategy in the simple way, consequently all of people can easily to understand the core of this reserve. This book will give you a lots of information about this world now. So you can see the represented of the world on this book.

Dawn Nelson:

Spent a free time for you to be fun activity to complete! A lot of people spent their spare time with their family, or their particular friends. Usually they doing activity like watching television, about to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Might be reading a book can be option to fill your totally free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the guide untitled Protein Surface Recognition: Approaches for Drug Discovery can be excellent book to read. May be it may be best activity to you.
