Qualitative Research Methods Monique Hennink, Inge Hutter, Ajay Bailey

This comprehensive text takes a practical approach that mirrors the path that students follow in conducting a research project. The book is based on the authors' highly successful multidisciplinary qualitative methods workshops, which have been conducted for over a decade. They introduce a 'qualitative research cycle' that leads students through the selection of appropriate methods, the collection of data, and the transformation of findings into a finished project. The book provides a clear explanation of the nature of qualitative research and its key concepts.
